Rebate forms available until the money runs out! Call the Lincoln Water Department 781-259-8997 to reserve your rebate money.

According to the Environmental Protection Agency, the typical U.S. household uses 48% of their water for toilet flushing and clothes washing. Older toilets use 3 – 8 gallons per flush, while WaterSense toilets use only 1.28 gallons. WaterSense washing machines use less than half the water used by older models. That means that switching to low use toilets and clothes washers could make a huge reduction in a family's water use – in the order of 20% or more.
