

Roadside and Path Vegetative Maintenance

During the summer and fall months, the DPW works to keep the Town roadsides and paths clear from vegetative encroachment. This is primarily done with the Department's mechanical mowers. Currently, the Department is tasked with maintaining approximately 102 lane miles of roadway and 15 miles of paths.

Occasionally, abutting homeowners wish to plant vegetation adjacent to the roadside. If this is the case, please contact the Department at 781-259-8999 and we will review the area with you. Typically, the Department will require that the homeowner provide identification of the area, such as stakes, and that the homeowner maintains the area.
