3. **ARPA ELIGIBLE SPENDING CATEGORY:** Infrastructure project

- a. **All eligible projects must fall under one of the federal categories. If you are unsure of the spending category, town administration will complete.**

4. **EXECUTIVE SUMMARY OF THE PROJECT:**

The Tower Road Well is over 50 years old. It has been cleaned many times, but water discharge rates diminish quickly after cleaning. This is indicative of a well at the end of it's useful life. A replacement gravel packed well must be installed. Water from the Tower Road well is a valuable asset that is essential in providing safe drinking water and fire protection to the Town of Lincoln. It provides a clean source of water with very low organics to improve the water quality. It also provides redundancy and resiliency to our water system as a potential single backup source if the Water Treatment Plant requires shutdown for maintenance or repairs. The requested ARPA funding would cover the installation of a test well, engineering to determine the specification and location of a replacement well, installation of the replacement well and testing to get the well online. The Tower Road Replacement Well project is important to all town residents who use town water or fire protection. With more working from home and less travel, the pandemic has made home life more important than ever. This is reflected in increased property values. Safe drinking water and fire protection enhances home life, quality of living and property values.

5. **POPULATION TO BENEFIT FROM PROJECT:** All town residents who use public drinking water and / or fire protection.
